CMCC Doc. No. 151.811
Copy 1 of 3
Page 1 of 1

Dear George:

It is probable that you may wish to place orders for the 1/2 mil Mylar base magnetic recording tape directly with the manufacturer of this material, and it is the purpose of this note to provide information concerning the manufacturer's address and the specifications that have been developed for the tape.

25X1A

The tape is produced by Audio Devices, Inc., whose address is 25 Parker Avenue, Glenbrook, Connecticut. Apparently [REDACTED] has handled some of our direct contacts with the company.

25X1A

The tape was originally prepared to our Specification No. 112. It may now be secured by ordering from Audio Devices stock No. HCLP-.3-250. A complete set of specifications for this tape is attached. The cost of the tape is \$38.17 per reel of 6500 feet.

The number of reels of tape required for any given operational period may be estimated as being equal to the number of operational flights anticipated during that period plus an amount sufficient to meet ground maintenance and testing requirements. All orders placed heretofore have specified that each reel shall contain a minimum of 6500 feet of tape, this length being sufficient for nine hours and 35 minutes of continuous recording.

Sincerely,

Burt

Burt
